SUMMARY

Software engineer working professionally since 2019. Focused on system design and the trade-offs behind technical decisions. Experienced across backend services, API design, and web and mobile apps, mainly in TypeScript, JavaScript, and PHP.

WORK EXPERIENCE

Software Engineer, PT Rivolta Solusi Teknologi

Samarinda, Kalimantan Timur · May 2024 - Present

- Initiated system architectures, Git workflows, and Scrum processes for new projects
- Built the offline-first sync and sales-reconciliation core, plus purchase-order, supplier-return, and inventory modules, for a retail POS & ERP platform in use across 5 store floors and 7+ terminals (Go, TypeScript, React, Electron, PostgreSQL)
- Built a real-time Q&A platform connecting learners and mentors: integrated video-call and notification SDKs, implemented AI-generated answers, and migrated file storage to Firebase Storage; tested by 250+ users (React Native, Next.js, TypeScript, Express.js, MongoDB, Firebase)
- Led the Q&A platform's rebrand into a mentorship app as Tech Lead (team of 3-5): built a dynamic rule engine for mentor selection, resolved critical performance issues, refactored backend logic for scalability, and managed UAT
- Developed milestone-based shipment tracking across backend, admin dashboard, and mobile app, plus role-based analytics dashboards, for a multi-tenant grocery delivery marketplace (Go, React Native, TypeScript, PostgreSQL, Firebase)
- Led full-stack development of a boat rental marketplace, handling code reviews and deployments, and served as the team's Scrum Master (React Native, TypeScript, Express.js, MongoDB, Firebase)
- Architected a provider-agnostic video layer and built server-side and React client SDKs for a multi-tenant, embeddable video conferencing platform designed to be delivered as an API and SDKs (LiveKit, TypeScript, Express.js, PostgreSQL)
- Conducted technical interviews in English for 7 international candidates and mentored interns

Software Engineer, Refactory

Sleman, Yogyakarta · September 2022 - December 2023

- Joined via the 3-month Intensive Pairing Program (Batch 11) and was converted to full-time Software Engineer
- Developed features and fixes for a shopping mall dashboard that visualizes data from a Singapore-based client's AI video analytics system, as an outsourced engineer on the client's English-speaking multinational team (React, Redux, Express.js, Knex.js, PostgreSQL)
- Carried out multiple frontend and backend revamps and migrated the dashboard to a newer Node.js version after analyzing affected dependencies
- Built frontend and full-stack features for client web applications across FMCG sales, enterprise, and government domains in Scrum (JavaScript, PHP, Vue.js, React)
- Ran weekly online pre-course sessions and an offline workshop as an instructor

Web Programmer, PT Barqun Digital Teknologi

Samarinda, Kalimantan Timur · August 2019 - June 2021

- Built a multi-user information system for a public health center from the start, designed database structures (ERD), and contributed to its revamp into a medical clinic app focused on medical check-ups (Laravel, PHP, MySQL)
- Developed RESTful web services for customs export-permit and hospital correspondence systems (Laravel, PHP, MySQL)

SKILLS

- Languages: TypeScript, JavaScript, PHP, Go (Golang), SQL
- Backend: Node.js, Express.js, Laravel, RESTful APIs
- Frontend, Mobile & Desktop: React.js, Next.js, Vue.js, Tailwind CSS, React Native, Electron
- Databases & BaaS: PostgreSQL, MySQL, MongoDB, Firebase, Supabase
- Tools & Practices: Docker, Git, Linux, Scrum / Agile

EDUCATION

Bachelor's degree in Computer Science (Teknik Informatika / Informatics Engineering)
STMIK Widya Cipta Dharma, Samarinda, Kalimantan Timur · Graduated February 2022

LANGUAGES

Indonesian (Native), English (Intermediate)
