SUMMARY

Software engineer with 5+ years of experience building backend services, RESTful APIs, and web and mobile applications, mainly in TypeScript, JavaScript, and PHP. 16+ projects across healthcare, retail, marketplaces, logistics, and government. Focused on system design: how the pieces fit together, and the trade-offs behind them.

WORK EXPERIENCE

Software Engineer, PT Rivolta Solusi Teknologi

Samarinda, Kalimantan Timur · May 2024 - Present

- Built the server-side offline-sync core (offline sales processing, stock reservation, and reconciliation for queued sales) for a retail POS & ERP platform used across 5 store floors and 7+ terminals (Go, PostgreSQL)
- Implemented full-stack purchase-order, supplier-return, and inventory modules across the Go API and React back office (Go, TypeScript, React, PostgreSQL)
- Built ESC/POS receipt printing for the Electron cashier terminal, plus the Windows scripts, installer integration, and setup guides to deploy it on store PCs (Electron, React, TypeScript)
- Developed a real-time Q&A platform (tested by 250+ users), integrated video-call and notification SDKs, implemented AI-generated answers, and migrated file storage to Firebase Storage (React Native, Next.js, TypeScript, Express.js, MongoDB, Firebase)
- Led a team of 3-5 as Tech Lead on the Q&A platform's rebrand into a mentorship app, built a dynamic rule engine for mentor selection, refactored backend APIs, and directed UAT (React Native, TypeScript, Express.js, MongoDB, Firebase)
- Built milestone-based shipment tracking and role-based analytics dashboards across backend, admin web, and mobile for a multi-tenant grocery delivery marketplace (Go, React Native, TypeScript, PostgreSQL, Firebase)
- Led full-stack development and served as Scrum Master for a boat rental marketplace, managing code reviews, Git workflows, and deployments (React Native, TypeScript, Express.js, MongoDB, Firebase)
- Architected a provider-agnostic video layer and built server-side and React client SDKs for a multi-tenant, embeddable video conferencing platform (LiveKit, TypeScript, Express.js, PostgreSQL)
- Bootstrapped new web, mobile, and backend projects, establishing core architecture, auth and routing foundations, Git workflows, and Scrum boards
- Conducted technical interviews in English for 7 international candidates and mentored interns

Software Engineer, Refactory

Sleman, Yogyakarta · December 2022 - December 2023

- Extended in-app notifications, the report designer, and dashboard-wide filtering for a shopping mall analytics dashboard app with real-time occupancy views, collaborating with the client's multinational team (React, Redux, Express.js, Knex.js, PostgreSQL, MySQL)
- Migrated backend services and queries from MySQL to PostgreSQL, revamped frontend and backend views, and upgraded dependencies to support Node.js 16
- Built frontend and backend features for enterprise and government client applications in Scrum teams (TypeScript, JavaScript, PHP, Vue.js, React, Laravel, Tailwind CSS, MySQL)
- Ran weekly online pre-course sessions and an in-person workshop as an instructor

Engineer Intern, Refactory

Sleman, Yogyakarta · September 2022 - November 2022

- Completed the 3-month Intensive Pairing Program (Batch 11), then promoted to full-time Software Engineer

Web Programmer (Full-Stack Developer), PT Barqun Digital Teknologi

Samarinda, Kalimantan Timur · August 2019 - June 2021

- Built the application logic and 70+ table database schema for a multi-user public health center information system, covering patient registration and queueing, clinical care, laboratory, pharmacy, and billing (Laravel, PHP, MySQL)
- Created PDF and Excel reporting across clinical and administrative modules, and extended the system with role-based permissions and batch and expiry tracking for pharmacy stock
- Revamped the system into a private medical clinic application, adapted clinical and cashier workflows, and built corporate medical check-up (MCU) packages, onsite screening, patient photo capture via webcam, and QR-based lab results
- Developed RESTful web services for customs export-permit and hospital correspondence systems (Laravel, PHP, MySQL)

SKILLS

- Languages: TypeScript, JavaScript, PHP, Go (Golang), SQL
- Backend: Node.js, Express.js, Laravel, RESTful APIs
- Frontend, Mobile & Desktop: React.js, Next.js, Vue.js, Tailwind CSS, React Native, Electron
- Databases & BaaS: PostgreSQL, MySQL, MongoDB, Firebase, Supabase
- Tools & Practices: Docker, Git, Linux, Scrum / Agile

EDUCATION

Bachelor's degree in Computer Science (Teknik Informatika / Informatics Engineering)
STMIK Widya Cipta Dharma, Samarinda, Kalimantan Timur · Graduated February 2022

LANGUAGES

Indonesian (Native), English (Intermediate)
