SUMMARY

Software engineer with 5+ years of professional experience since 2019. Focused on system design and the trade-offs behind technical decisions. Experienced across backend services, API design, and web and mobile apps, mainly in TypeScript, JavaScript, and PHP.

WORK EXPERIENCE

Software Engineer, PT Rivolta Solusi Teknologi

Samarinda, Kalimantan Timur · May 2024 - Present

- Built the server-side offline-sync core (offline sales processing, stock reservation, reconciliation) and the purchase-order, supplier-return, and inventory modules for a retail POS & ERP platform used across 5 store floors and 7+ terminals (Go, TypeScript, React, Electron, PostgreSQL)
- Developed a real-time Q&A platform connecting learners and mentors: integrated video-call and notification SDKs, implemented AI-generated answers, and migrated file storage to Firebase Storage; tested by 250+ users (React Native, Next.js, TypeScript, Express.js, MongoDB, Firebase)
- Led the Q&A platform's rebrand into a mentorship app as Tech Lead (team of 3-5): built a dynamic rule engine for mentor selection, refactored backend logic for scalability, and managed UAT (React Native, TypeScript, Express.js, MongoDB, Firebase)
- Developed milestone-based shipment tracking across backend, admin dashboard, and mobile app, plus role-based analytics dashboards, for a multi-tenant grocery delivery marketplace (Go, React Native, TypeScript, PostgreSQL, Firebase)
- Led full-stack development of a boat rental marketplace, handling code reviews and deployments, and served as the team's Scrum Master (React Native, TypeScript, Express.js, MongoDB, Firebase)
- Architected a provider-agnostic video layer and built server-side and React client SDKs for a multi-tenant, embeddable video conferencing platform delivered as an API and SDKs (LiveKit, TypeScript, Express.js, PostgreSQL)
- Bootstrapped new web, mobile, and backend projects — setting up project architectures, auth and routing foundations, linters and Git hooks, branching workflows, and Scrum boards
- Conducted technical interviews in English for 7 international candidates and mentored interns

Software Engineer, Refactory

Sleman, Yogyakarta · September 2022 - December 2023

- Extended the notification system, report designer, and dashboard-wide filtering of a shopping mall analytics dashboard with real-time occupancy views, working in a client's English-speaking multinational team (React, Redux, Express.js, Knex.js, PostgreSQL, MySQL)
- Carried out multiple frontend and backend revamps, migrated backend services and queries for a MySQL-to-PostgreSQL database and schema migration, and made the dashboard run on Node.js 16 (from 14) by analyzing and upgrading affected dependencies
- Built frontend and full-stack features for client web applications across FMCG sales, enterprise, and government domains in Scrum (TypeScript, JavaScript, PHP, Vue.js, React, Laravel, Tailwind CSS, MySQL)
- Ran weekly online pre-course sessions and an offline workshop as an instructor
- Joined via the 3-month Intensive Pairing Program (Batch 11) and was converted to full-time Software Engineer

Web Programmer (Full-Stack Developer), PT Barqun Digital Teknologi

Samarinda, Kalimantan Timur · August 2019 - June 2021

- Built the application logic and 70+ table database schema of a multi-user public health center information system from the ground up, covering patient registration and queueing, clinical care, laboratory, pharmacy, and billing (Laravel, PHP, MySQL)
- Created PDF and Excel reporting across clinical and administrative modules, and extended the system with role-based permissions and batch and expiry tracking for pharmacy stock
- Revamped the system into a private medical clinic application, adapting clinical and cashier workflows and building corporate medical check-up (MCU) packages, onsite screening, and QR-based lab result delivery
- Developed RESTful web services for customs export-permit and hospital correspondence systems (Laravel, PHP, MySQL)

SKILLS

- Languages: TypeScript, JavaScript, PHP, Go (Golang), SQL
- Backend: Node.js, Express.js, Laravel, RESTful APIs
- Frontend, Mobile & Desktop: React.js, Next.js, Vue.js, Tailwind CSS, React Native, Electron
- Databases & BaaS: PostgreSQL, MySQL, MongoDB, Firebase, Supabase
- Tools & Practices: Docker, Git, Linux, Scrum / Agile

EDUCATION

Bachelor's degree in Computer Science (Teknik Informatika / Informatics Engineering)
STMIK Widya Cipta Dharma, Samarinda, Kalimantan Timur · Graduated February 2022

LANGUAGES

Indonesian (Native), English (Intermediate)
